E-mail: NASA_order@lcjvs.net

Educator Resource Center Network (ERCN) NASA's Educator Resource Center (ERC) network helps educators learn about and use NASA educational resources, and provides NASA materials. Visit education.nasa.gov/ercn for more information.

Regional Educator Resource Centers offer access to NASA educational materials for educators. NASA has formed partnerships with universities, museums, and other educational institutions to serve as Regional ERCs in many states.

Here is a list of the regions served, the associated NASA field center, and the ERC address and telephone number. Educators may wish to visit an individual NASA field center's ERC website for details on materials, resources, directions, hours of operation, and other information (see education.nasa.gov/ercn for links).

NASA's education home page (education.nasa.gov) serves as the portal for information about educational programs and services offered by NASA. A high-level directory of information provides details and points of contact for all of NASA's educational efforts, NASA field center offices, and points of presence within each state. Electronic resources developed for the educational community are at www.nasa.gov; click on "For Educators."

The NASA portal (www.nasa.gov) is the gateway for information about content, programs, and services offered for the general public and the education community. NASA's goal is to improve interactions for students, educators, and families with NASA and its education resources. The NASA portal has links to topics as well as themes, and special features such as NASA History.

The NASA multimedia (www.nasa.gov/multimedia) webpage features International Space Station and Space Shuttle mission coverage, live special events, interactive educational live shows, electronic field trips, aviation and space news, and historical NASA footage. Links to a variety of NASA resources can be found here, such as the NASA image of the day, videos (including high-definition videos), audio and video podcasts, and interactive features. The World Book @ NASA link leads to in-depth articles about space phenomena, astronauts, and other topics of interest. NASA television live events, news, and special event programs are listed, as well as the regular daily schedule (public and media channels), the NASA television education channel, and NASA television video file information. A list of RSS (Really Simple Syndication) feeds provides headlines, summaries, and links to full content on NASA websites.
